Graduation Rate – 2016-2017

Effective governance and appropriate accountability mechanisms are key factors in ensuring that the citizens of Ontario are well served by government agencies and transfer payment recipients. They are also crucial to the successful achievement of the colleges’ objectives. Performance measurement through the collection of performance indicators is an important accountability tool.

The Ministry of Advanced Education and Skills Development (MAESD) and the colleges of applied arts and technology have defined five Key Performance Indicators (KPIs) to measure, in a consistent manner across the college system, college performance against ministry stated goals and objectives. The five KPIs are:

- Graduate employment
- Graduate satisfaction
- Employer satisfaction
- Student satisfaction; and
- Graduation rate

The first three KPIs – graduate employment, graduate satisfaction, and employer satisfaction – are used to distribute performance funding to the colleges.

The KPI data are used by colleges to demonstrate their achievements and to identify where changes could be made to programs and services to better meet the needs of students. The ministry also uses the data to advise and inform government about the colleges and in the planning and policy-making for the college system.
